CCE 4200

Product Group	Coin Counter	ECB-approved coin counter

The most important features

ECB-approved coin counter
without sorting, all-in/all-out

Current test 03/2025

Foreign coins and counterfeit money are sorted into their own compartment

For high coin volumes

Counting speed
600 coins per minute

Introduction

The CCE 4200 is a high-performance coin counting machine that has been specially designed for businesses with large volumes of coins. Unlike the CCE 4300 and CCE 4400 models, the CCE 4200 does not sort the coins into separate compartments, but instead carries out a fast and precise value and piece count. In the process, counterfeit and foreign coins are reliably detected and sorted out, while the checked coins are dispensed again unsorted.

The selection menu can be used to select a coin type that is separated from the others and counted.

The ECB-approved counterfeit detection ensures maximum security when processing Euro coins. The clear display shows both the total value and the exact number of counted coins. An adjustable count stop makes it possible to specify fixed quantities in order to prepare cash balances in a targeted manner. This also allows for single-type coins to be counted and bagged using the optional accessories.

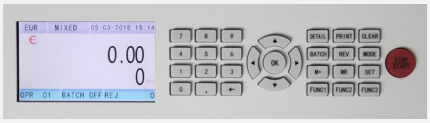

Thanks to its high counting speed and easy operation, the CCE 4200 saves valuable time and reduces errors in cash processing. Its robust construction ensures a long service life, while the well-thought-out design allows for easy cleaning and maintenance. It is the ideal solution for anyone who wants to count coins quickly and efficiently without sorting them.
